117 (18' x 22')	\$299.95

Fully heated and air conditioned storage units offer protection against the cold, rain, and dampness. All of our storage units are dry, clean and have easy access.

Climate control maintains a steady temperature of 55-80° using central air conditioning and heat. Maintaining a controlled environment minimizes risk of:

- Warping, cracking and splitting
- Rust, yellowing and corrosion
- Mold, mildew and bacteria overgrowth

Our climate-controlled storage units are part of a finished building with indirect heating and cooling (compared to air conditioners or heaters within individual units). The enclosed environment of our building can also provide increased protection from dust, dirt and flooding.
